# Alpine Quest Howto

## Search

- Click on the flag icon
- Click on **Search a Location**
- Type in location, click on **Search** button
- It'll get added to the **Display landmarks** menu
- Or, click through the folders under **Display landmark.**
- Or touch an icon and click on **Target**
- It'll get added to the **Display landmarks** menu, and draw a line from your current position to the selected icon

## Set a location

- Click on the flag icon
- Click on **Create landmark**
- Click on **Waypoint**
- Type in a name, click OK for current location.
- Clicking **More**, let you change the icon or color.
- Clicking the little triangle on the right side of the coordinates line, lets you enter coordinates for someplace other than your current location.

# Alpine Quest Howto

What are your coordinates

- Top left of the screen, they're always displayed

Misc stuff

- Using the + and – keys to zoom seems to work better than fingers
- To get the tablet control buttons back, swish up from the bottom of the screen

# GPS Essentials Howto

## Using the Dashboard or compass icons

- Get current GPS coordinates
- Get current altitude
- Get current sunset or sunrise times
- Get amount of time till sunset or sunrise

## How to change the display

- Tap an empty box
- Tap the data you want displayed in that box
- Remove data by touching and holding the box, slide it to the trash icon on the lower right
